Loop Question

For Loop

Q1. Write a Python program to reverse string without using slicing.

Sample TestCase:

Input:

> Pentagon Space

Output:

> ecapS nogatneP

Q2. Write a Python program to reverse strating 5 index from string without using slicing.

Sample TestCase:
Input:

> Pentagon Space

Output:

> gatnePon Space

Q3. Write a Python program to remove duplicate values from string.

Sample TestCase:
Input:

> Pentagon Space

Output:

> Pentago Spc

While Loop

Q4. Write a Python program to reverse string without using slicing.

Sample TestCase:

Input:

> Pentagon Space

Output:

> ecapS nogatneP

Q5. Write a Python program to reverse last 5 index from string without using slicing.

Sample TestCase:
Input:

> Pentagon Space

Output:

> ecapPentagon S

Q6. Write a Python program to remove duplicate values from string.

Sample TestCase:
Input:

> Pentagon Space

Output:

> Pentago Spc
